PROJECTS

Compiler Program

Individual Project

- Implemented a program in C++ that traces input strings over an arithmetic alphabet while checking against the production rules to verify if given input string will be accepted or rejected by the compiler.
- Utilizes a parsing table and data structures such as a stack to store the symbols.

Client-Side JavaScript Web Application

Group Project

- Designed and implemented a client-side game application, Rock Paper Scissors, using HTML, CSS, and JavaScript.
- Features a scoreboard, round counter, theme switcher, game over popup menu, and working HTML Web Storage to save the game.
- Collaborated with my team and used Node.js, Tailwind CSS, and DaisyUI to help build the application.

WORK EXPERIENCE

Produce Clerk, Courtesy Clerk, & Cashier

Ralphs Grocery

📅 07/2017 - 08/2021   📍 Foothill Ranch, CA

- Offered strong customer service skills for over 4 years by responding to inquiries and locating products.
- Helped team members and managers when necessary, especially adapting to and working multiple departments upon request.
- Increased sales in the produce department by cleaning shelves, managing displays, and stocking items in a purposeful way.
- Rewarded multiple times for excellent customer reviews.
